

SecureG Enlists Bill Anderson as Chief Technology Officer

Tech business leader to drive growth creating high-value products and services at PKI innovator

Herndon, VA – August 25, 2022 – [SecureG, Inc.](#), a leader in cloud-native PKI for zero-trust machine communications, today announced that security industry veteran Dr. [Bill Anderson](#) has joined the company in the role of Chief Technology Officer. Anderson brings three decades of experience with high-growth companies in cybersecurity and mobile technology. Bill has held executive roles at multiple public and private technology companies including CIS Secure, Allied Minds, SafeNet and Certicom. He previously founded Oculis Labs and served as Vice Chair of Maryland TEDCO.

“I thrive at the intersection of mobile and public key infrastructure,” commented Anderson, “The mission to secure the nation’s critical infrastructure with a next-generation machine identity solution for Zero Trust is highly motivating as is the opportunity to work with a team, a board and investors all aligned for success.”

“Bill truly understands customer needs and knows how to drive creation of high-value product and services solutions,” remarked [Mike Denning](#), SecureG CEO. “His ability to craft a compelling vision and strategy promises to engage the cybersecurity marketplace and drive growth for SecureG.”

About SecureG

Critical infrastructure relies on secure communications between networked intelligent devices. SecureG delivers robust device identity management, enabling Zero Trust applications at speed and scale. Unlike legacy PKI for browser-based security, SecureG offers cloud-native PKI designed to automate and streamline machine identity management where security is paramount.

SecureG headquarters is in greater Washington DC, with remote presence across North America. For additional information, visit <https://secureg.io/>
